# BARRON'S GROUP STOCK AVERAGES

Barron's group stock averages are a simple arithmetic average based on closing prices as of Thursday each week. In cases where there have been split-ups in issues included in the averages, or where large stock dividends have been paid, adjustments have been made to keep the averages comparable throughout the period for which they have been computed, January 1937 to date. A list of the stocks on which these averages are based follows:
